CARTUCCE DI RICAMBIO:

CBC / KDF miscela per efficace riduzione di: cloro, batteri, ferro, calcio e solfuro di idrogeno.

- Portata: 2-3 lpm
- Durata del filtro: 1000 litri @ 2 ppm di cloro influente, 80% a fine vita, (6 mesi)
- · Grado di filtrazione: 5 micron

GAC

- · Portata: 1-2 lpm
- Durata del filtro: 750 litri @ 2 ppm di cloro influente, 80% a fine vita, (3 mesi)
- · Grado di filtrazione: 20 micron

CARTRIDGES SPARES:

√CBC / KDF blend for Chlorine, Bacteria, Iron Scaling and Hydrogen Sulfide reduction.

- Flow rate: 2-3 lpm
- Filter life: 1000 liters @ 2 ppm of chlorine influent, with life reduction rate end 80% (6months)
- Micron rating: 5 micron

GAC

- Flow rate: 1-2 lpm
- Filter life: 750 liters @ 2 ppm of chlorine influent, with life reduction rate end 80% (3months)
- Micron rating: 20 micron

CHLORINE	92%
PESTICIDES	74%
TRIHALOMETHANES	85%
INDUSTRIAL SOLVENTS	76%
